

MTS Data Centres

Reliable,
Secure,
Connected

MTS

At MTS Data Centres Waverley, we're proud to offer a full range of services to house and manage your IT environment. We offer solutions that provide peace of mind so you can focus on growing your business while we protect your data.

Reliable

Designed and built to provide best in class reliability. To ensure data is accessible, we can generate our own power to maintain availability to your IT equipment. With built-in redundancies and capabilities for power and cooling, we can service any data centre infrastructure component without impacting your IT operations.

Secure

MTS Data Centres Waverley features superior infrastructure redundancy with a second floor data hall and reliability that won't disrupt your operations. On-site Network Operations Centre staff and security provide 24/7 security, customer access and support.

Connected

We offer diverse fibre connectivity, making it easy for you to connect to the full suite of MTS services, or any carrier of your choice. Our low latency profile can support the most demanding applications.

Uptime Institute Tier III Design verifies that MTS Data Centres Waverley has been rigorously designed to deliver superior reliability. MTS Data Centres Waverley is the only Tier III Design Certified facility in Manitoba.

We adhere to 3rd party CSAE 3416 standards for effective internal controls to meet control objectives.
